Laikipia County, extending from the forested slopes of Mt Kenya and the Aberdares northward into the arid zone of Kenya, has long been a destination for adventurous tourists and intrepid researchers. With the rapid development of tourism in the region, as well as growth and expansion of ecological research on Mpala Ranch and elsewhere, bird-watching and ornithological research are on the rise.

This list is a compilation from a number of sources. The initial lists were compiled by Mpala researchers, including James Lynch, Colin Tait, Daniel Niven, Sulyn Talbot, Truman Young, Wanoike Wamiti, and Brad Bergstrom. Truman and Brad have made special efforts to cross-reference lists, focusing on Mpala and Segera Ranches. In collaboration with Laikipia Wildlife Forum and Phillista Malaki of National Museums of Kenya, we conducted bird surveys in Mukogodo, Marmanet, and Rumuruti Forest Reserves, as well as Ol Pejeta, Segera, Mpala, Mathira II, IlMotiok and Loisaba ranches. In addition, we received bird lists from Borana, Loisaba, Ol Pejeta, Sosian, and Tumaren. The list was vetted by Terry Stevenson, co-author of *Birds of East Africa*, for which we are most grateful. Of 1,133 species known to occur in Kenya, we have records for 545 species, or 48% of Kenya's documented species. Laikipia County is clearly a bird hotspot for Kenya and East Africa.

The taxonomy and common names follow the *Field Guide to the Birds of East Africa* by Terry Stevenson and John Fanshawe. Species lists are always a work in progress. We invite all interested parties to make contributions and corrections to this list.
